DUTIES	NECESSARY.)		
	ESSENTIAL FUNCTIONS:		
35%	<b>Ecological Expertise:</b> Work closely with the Department of Water Resources and United States Bureau of Reclamation to perform quality assurance and quality control on fish identifications and processing at the fish salvage facilities to ensure accuracy of salvage and operations data records. Attend relevant team meetings such as for the Tracy Technical Advisory Team and Central Valley Fish Facility Technical Team.		
30%	Data Analysis and Management: In collaboration with other Environmental Scientists (ES) and Region staff, the incumbent combines and summarizes fish and environmental data. Maintain databases. Under general guidance, perform data analyses, data storage, data editing, data summarization, and simple statistical analyses. Assist other ESs with advanced research methodologies, field sampling designs, complex statistical techniques, and advanced data analysis/processing as needed.		
15%	<b>Reporting:</b> Disseminate data in summaries and oral reports to the Smelt Working Group and the Data Assessment Team as requested by the federal Biological Opinions mandates or state incidental take permits. Organize results and prepare written reports and oral presentations for management, technical teams, and local professional publications such as the IEP Newsletter. Draft, collaborate, and review peer-reviewed scientific journal articles.		
10%	<b>Study Planning and Execution:</b> Assist in study plan development, including resource and logistical planning. Develop crew schedules and staffing, coordinate with boat operators and lab staff; and schedule and assign routine work to temporary staff. Aid and administer the completion of these planned studies in the field. Train temporary employees.		
5%	Miscellaneous Duties as Required: Maintain inventory of sampling equipment, nets, and electronic instruments.

DUTIES

INDICATE THE DUTIES AND RESPONSIBILITIES ASSIGNED TO THE POSITION AND THE PERCENTAGE OF TIME SPENT ON EACH. GROUP RELATED TASKS UNDER THE SAME PERCENTAGE WITH THE HIGHEST PERCENTAGE FIRST. (USE THE REVERSE SIDE IF NECESSARY.)

## **NON-ESSENTIAL FUNCTIONS:**

5%

Attend relevant training and continuing education necessary to maintain and improve job skills. Attend appropriate meetings, workshops, and scientific conferences. Prepare annual individual work plans, timesheets, and other administrative documents as required. Continually practice and promote respectful communication as well as organizational and professional vitality in part by (1) pursuing and completing pertinent formal educational opportunities (e.g., training and seminars), (2) participating in pertinent workshops, workgroups, and staff meetings, and (3) participating in activities to support IEP Operations Program.

## **KNOWLEDGE AND ABILITIES:**

**Knowledge of:** Basic principles of land, water, fish, wildlife, and other natural resources research; principles of ecology; soil and irrigation sciences, resource management, hydrology, geology, and waste prevention; statistical methods; land-use practices with reference to their general effect on human health, natural resources, agricultural productivity, and the environment; effects of hazardous and non-hazardous waste material and their interactions on the environment; chemical reactions; California and Federal environmental laws, rules, regulations, and requirements; basic toxicology, hydrology, geology, and principles of risk assessment and risk management; concepts employed in a variety of disciplines including environmental planning, economics, and resource management; geolocation and geo-referencing software applications, resource conservation program impacts and implementation strategies; and recycling issues.

Ability to: Apply or modify scientific methods and principles; collect environmental data; analyze and evaluate data and reach sound conclusions; review, check, and interpret scientific and environmental reports; analyze situations and take appropriate actions; establish and maintain cooperative relations with all persons contacted; communicate effectively; prepare clear, complete, and technically accurate reports; apply laws, rules, regulations, policies, and requirements of California and Federal environmental protection and resource management programs; assess the impact of proposed State and Federal environmental legislation and regulations; understand principles of risk assessment and risk management; work with professionals from a variety of disciplines within and outside of State government; and review and understand technical research reports on emerging public health and environmental issues.

## **DESIRABLE QUALIFICATIONS:**

**Knowledge of:** Basic principles of marine, freshwater, and estuarine ecology; fisheries biology and management; zooplankton biology and ecology; common fisheries and plankton sampling methods; database management; statistical analyses; technical writing; and relevant software.

**Skill to:** Efficiently and effectively read, write, and speak English; provide and accept feedback, act in the capacity of a lead; collaborate with team members; engage stakeholders; organize, prioritize, and delegate tasks; and shift rapidly from task to task as priorities dictate. Efficiently and accurately use a personal computer and software including but not limited to Access, Excel, PowerPoint, Word, EndNote, SYSTAT, SigmaPlot, and Outlook; collect and store ecological data, manipulate and summarize that data, then analyze, synthesize and report the resulting information in written and oral forms; identify key invertebrates as well as juvenile and adult marine, freshwater, and estuarine fishes.

**Ability to:** Use a laptop/desktop computer on a daily basis and develop proficiency in commonly used software including Microsoft Access, Excel, PowerPoint, Word, SYSTAT, and R at a level required for successful job performance; maintain, organize, and work with large data sets; prepare clear and concise data presentations and summaries in figures and tables; make oral presentations to scientific and general audiences; safely work and enforce safety protocols on a research vessel;

swim; work with samples preserved with formalin or ethanol in properly ventilated situations; direct the work of others and provide feedback to subordinates in a timely manner; lift up to 40 pounds.

**Special Personal Characteristics**: Interest in estuarine ecology and marine and estuarine fishes and invertebrates. Commitment to develop and improve understanding of the ecology of the San Francisco Estuary and biology of the fishes and invertebrates that inhabit it. Able to act independently and with tact; maintain open-mindedness and flexibility; and show good-judgment when encountering unexpected situations. Possesses strong organizational skills and is quality performance-oriented; has good written and oral communications skills; and adheres to written safety and sampling procedures and protocols.

**Interpersonal Skills**: Works well with others and can work independently and effectively in a team setting especially during field work and at meetings. Responds favorably to feedback and able to communicate effectively with a variety of personalities within and outside of the department.

**Other:** Possess a valid driver's license. Comfortable working around water, and possesses the ability to swim.

## **WORKING CONDITIONS:**

Must routinely work long and non-standard hours or schedules seasonally. Field work requires standing and walking on uneven, moving, steep, and slippery surfaces. Field work also requires significant automobile travel time to facilities. Office work involved mostly sitting at a desk most of the time with computer keyboard or desk work several hours per day, but may involve walking or standing for brief periods. Laboratory work requires handling formalin or ethanol in properly-ventilated situations, and the ability to lift up to 40 pounds. Must be able to operate a motor vehicle and be prepared to travel using a State vehicle. In the event of an emergency, may need to operate a small motorized boat.
